

## ABSTRAK

Kerupuk Tasik Bu Asih saat ini masih melakukan jual-beli, pesanan, dan pelaporan transaksi secara konvensional sehingga dapat menimbulkan beberapa kendala seperti ketidakcocokan saat pelaporan pemesanan dan pembuatan laporan yang memakan waktu lama. Maka, dibuatlah sebuah Sistem Informasi Jual-Beli Kerupuk Tasik Berbasis Website. Sistem Informasi Jual-Beli Berbasis Website ini dibuat dengan metode waterfall untuk pengembangannya dengan aplikasi Visual Code serta menggunakan MySQL untuk membuat basis datanya, bahasa pemrograman menggunakan HTML, PHP, Java Script, CSS, serta Framework Laravel. Diberikan 2 hak akses yaitu, pelanggan dan admin. Dimana pelanggan dapat memesan secara online, sedangkan admin dapat melanjutkan pemesanan pelanggan untuk di proses dalam pembelian dan pengiriman.

Kata Kunci: Jual-Beli, Kerupuk, Sistem Informasi

## ABSTRACT

Currently, Bu Asih Tasik Crackers still carries out buying and selling, orders, and transaction reporting conventionally, which can cause several obstacles such as inconsistencies when reporting orders and taking a long time when report making. Therefore, Website-Based Information System for buying and selling Tasik Crackers of Bu Asih, Wiradesa has been created. The system was created by waterfall method and for the development, visual code application and MySQL were implemented. Besides, to create the database, the programming languages HTML, PHP, Java Script, CSS, and Laravel Framework are used. In this case, it was given 2 access rights: for customers and for admins. With the access right, customers can order online, while the admin can continue the customer's order to be processed for purchasing and shipping.

Keywords: buying and selling transaction, crackers, information system
